The Executive Governor

Rivers State Government

Government House

Port Harcourt

ATTN: **Barrister Nyesom Wike CON**

His Excellency,

RE: PETITION TO THE UNITED NATIONS ON PREVALENCE OF DANGEROUS SOOT IN PORT HARCOURT

We hereby forward a copy of our petition to the United Nations on the subject matter to you.

Our frustration and resort to the world body stems from the inaction from all tiers of government for the past 23 months in spite of our cries and robust recommendations to Federal, State & Local Governments.

We were further alarmed and compelled to act with the myriad of scientific reports that abound about the hazardous nature of continuous inhalation of sub-micron heavy metal laden particulate matter in the Port Harcourt atmosphere and its environs: thus we have included 3 studies on the subject matter highlighting the consequences of inaction by the Federal Government of Nigeria.

We are tired of the politicization of the matter and for all state actors at all levels of government to come to the realization that "Rivers Lives Matter" particularly that of the infants and children.

It is our prayer that this report will not be drowned in this season of partisan politics and for all sides of the partisan divide to 'fear our Creator' and raise a very robust multi-partisan approach in the resolution of this problem before it is too late.

Thank you,

Yours faithfully
